Features

Thickness 1.2 in Door & Frame

Designed for durability, our stainless steel elevator autodoors feature a robust 1.2-inch thickness for both the door and frame, ensuring superior strength and long-lasting performance.

01

Sill-less Design

Our sill-less design eliminates unnecessary protrusions, offering a sleek and seamless finish that enhances both aesthetics and accessibility, making it ideal for modern elevator systems.

02

Interlocking Doors

Equipped with advanced interlocking technology, the doors ensure enhanced safety and precise alignment, preventing accidental openings during operation.

03

Smooth Operation

Engineered for effortless functionality, these doors provide smooth and noiseless operation, enhancing user experience while maintaining reliability.

04

Easy Installation

Our autodoors are designed for hassle-free installation, saving time and reducing labor costs without compromising on quality or performance.

05

Integrity

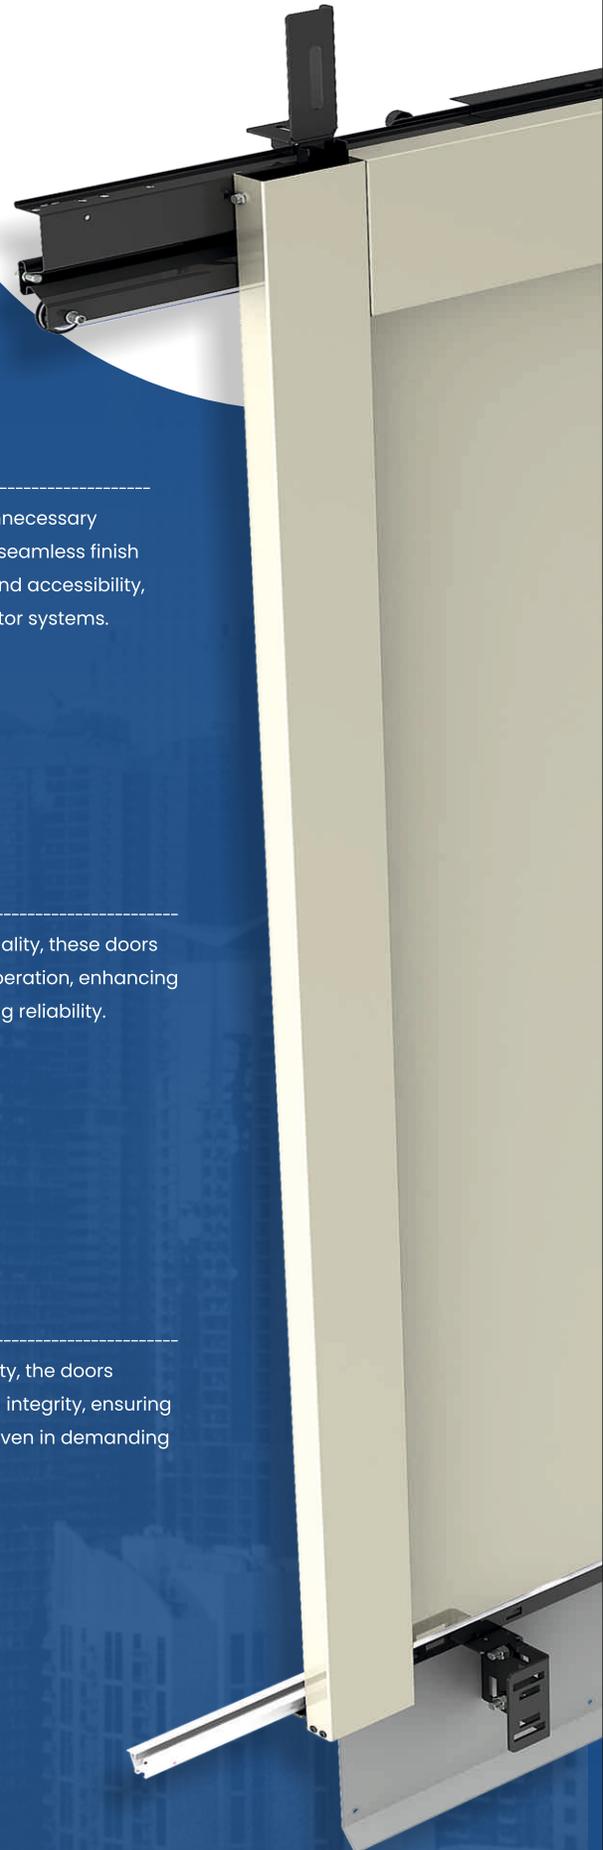

Built with uncompromising quality, the doors guarantee exceptional structural integrity, ensuring long-term safety and reliability even in demanding conditions.

06

Dual Certification

Fully certified to meet both European (EN-81-58) and Indian (IS-17518) fire safety standards, these doors offer unparalleled assurance and compliance across multiple regions.
